

Apple Silicon Supplement

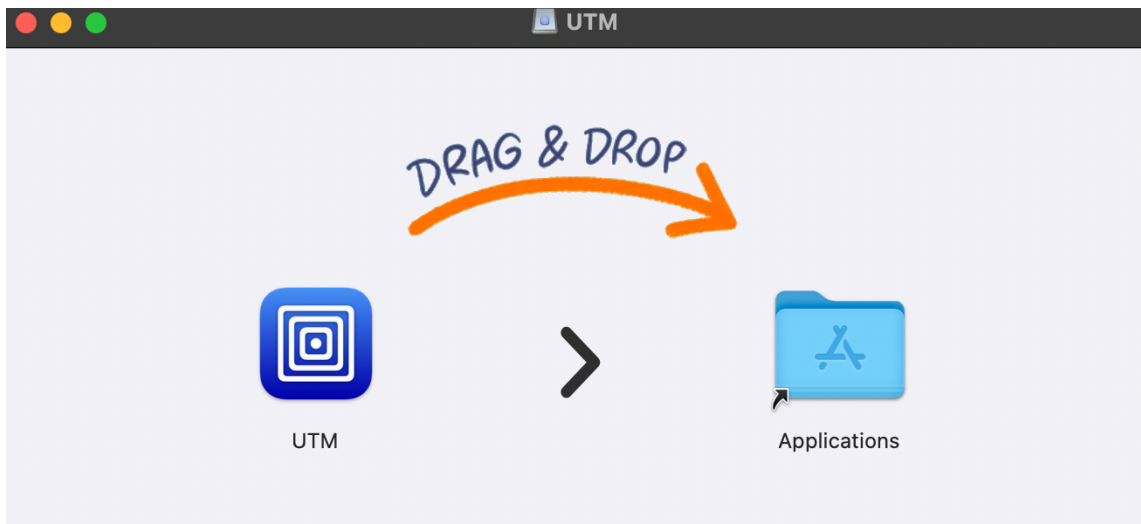

Download UTM

UTM is a software that allows you to create and run Virtual Machines.

[Click here to download UTM.](#)

Install UTM

Double-click the file you just downloaded. Drag and drop the UTM application into the Applications folder.

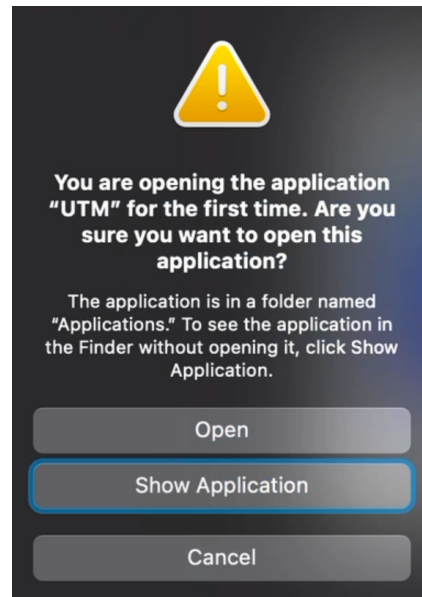

Download the Fedora Linux Image

[Click here to download the Fedora Linux Image.](#)

Once the image is downloaded, double click it to unzip it. You will then see a file named "Fedora 34.utm".

Import the Fedora Image into UTM

Double-click the "Fedora 34.utm" file. If you are prompted to open the application, selected "Open". You may have to do this two times.

Start the Fedora Virtual Machine

Click the "Play" button to start the virtual machine.

Log Into the Virtual Machine

Click on the username of "adminuser". Enter the password of "adminuser" and press <ENTER> to log in.
