Dear Mrs. Smith:

My name is Alex Genadinik. I am a senior software engineer with a B.S in Computer Science and over five years of experience in the mobile app and ecommerce industries. I would like to apply for the senior Android app developer position you have open.

I've been developing apps like the one you described in your job description for over two years now. I've launched an app in this space which was downloaded over 100,000 times. I believe that I could bring much more than just my programming skills to this position. I can also add industry experience, product planning experience, and years of interacting with real customers in this space.

I am attaching my full resume to demonstrate my experience with the programming, business, and creative problem solving you are seeking with this position. I look forward to hearing from you.

Sincerely,

(Written signature if you are mailing the letter)

Alex Genadinik
Senior Software Engineer
